JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

focus is in the Tijuca district and at an elevation of about 250 feet above sea level. The work of suppression of the outbreak is being carried on by the health department.

Change in the published city population.—The census of 1906, giving the population as 811,265, is officially considered incorrect, and an estimate of 628,675 is now made. This is a very great difference, and means a very much higher death rate. These last figures are for the city alone, not for the federal district, as were the figures previously given.

Week ended April, 28, 1907. Vessels inspected and received bills of health: On the 23d instant the Norwegian bark *Manzu*, for Pensacola, Fla., in stone ballast, no passengers, and with one new member of the crew taken on while in this port; on the 27th instant the British steamship *Bellauna*, for New Orleans, with a cargo of coffee, no passengers, and with one new member of the crew signed on while in port; and on the 28th instant the Norwegian steamship *Rauma* (chartered ship of the Lloyd Brazilian Line), for New York, in coffee cargo, with one new member of the crew signed on here, and with no passengers. The one new member of crew signed on here replaced the loss of the captain of this vessel, who died here on the 20th instant.

Mortality, Bahia.—Month of November, 1906. Total deaths, 395. Bubonic plague, 8 deaths. Month of December, 1906. Total deaths, 430. Bubonic plague, 12 deaths. Population, estimated, 265,000. Births during November, 232; during December, 213.

During year 1906. Total deaths, 4,817. Bubonic plague, 95; variola, 15.

Rio de Janeiro.—Week ended April 28, 1907. Total deaths, 243. Yellow fever, 3 new cases reported with 2 deaths; bubonic plague, 3 new cases reported with 1 death; variola, 2 new cases reported with no deaths from this cause. At the close of the week there were in the Hospital São Sebastião, 1 case of yellow fever, 5 cases of variola, 2 cases of plague, and 16 cases of suspicious illness.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Robertson reports as follows: Week ended May 16, 1907. Present officially estimated population, 8,500; general sanitary condition of this port and the surrounding country during the week, good.
